

## PHOSPHATE FERTILIZER ADDITIVES

<b>Protect</b>	3 qts/ton <i>For dry phosphate fertilizer</i>	Protect products are phosphate fertilizer additives that reduce phosphate and micronutrient fixation in the soil allowing for maximum uptake of phosphorus by the plant.
<b>Protect LFS</b>	1.7 gal/ton <i>For liquid phosphate fertilizer</i>	

## NITROGEN FERTILIZER ADDITIVES

<b>Hold-oN</b>	3.25 qts/ton <i>For Urea</i>	Hold-oN products are urease inhibitors for use where above ground nitrogen loss occurs due to volatility.
<b>Hold-oN LFS</b>	3.25 pts/ton <i>For UAN</i>	

## MICRONUTRIENT PRODUCTS

<b>Opening Act</b>	1 gal/acre <i>In-Furrow</i>	Micronutrient add on package. Can be used on all crops. 0-0-12-4.2S-2.2Z-.7Mn
<b>Chelated Zinc</b>	1 qt/acre <i>Row Starter</i> 1-4 qt/acre <i>Soil Broadcast</i>	A Chelated Zinc source designed for soil broadcast or row starter applications. NOT for foliar applications.

<b>Microblend Foliar</b>	1-2 qts/acre <i>Foliar Applied</i>	Enhanced blend of macro & micro nutrients that can be foliar applied on a wide variety of crops.
<b>Microblend In-Furrow</b>	1-2 qts/acre <i>Soil Applied</i>	Same product as Microblend Foliar without Boron. Position this when soil samples don't require micronutrients, but the grower is looking for a bump.
